STRESS AWARENESS MONTH

Stress and poor mental health are one of the biggest public health challenges that we're facing. Sadly, even though that is the case, we are still not taking its impact seriously enough. We continue to separate mental health from physical health and vice versa. The reality is they cannot be separate – they are two sides of the same coin. There is no health without mental health and stress can lead to numerous health problems. From physical problems, like heart disease, insomnia, digestive issues, immune system challenges etc to more serious mental health disorders such as anxiety and depression.

Head to
<https://www.stress.org.uk/individual-stress-test/> to see if you're stressed and find ways to help yourself or, if you're reading a physical copy of this, scan the QR code below.
